

SALES AND MARKETING ENABLEMENT

How-to Guides

How-to guides include the necessary information your customers need to know about how to use the product or solution. Extra Mile Marketing will take your comprehensive list of complex and detailed product processes and create a simple and easy to understand guide that improves the out-of-box experience for your audience. Although most how-to guides are technical and often lengthy, we've mastered the exact balance of design and content to create clear, engaging, and easy-to-use how-to guides that can be used by your customers, partners, and internal teams.

To discuss options for how to guides to help your team achieve their sales goals, send us a quick [email](#) or call us at (425) 746-1572, and we'll set-up a meeting.
